

The Missing 6809 *UniFLEX* Archive

UniFLEX'09 for SWTP & Gimix - Plus ALL Products Ever Developed!

The *UniFLEX*'09 Archive represents ALL known products that were developed / or adapted by Technical Systems Consultants, Inc. (TSC), from late in 1979 through to 1989 when, at that time, the Company and *UniFLEX* O/S were sold to an "investor." The 6809 versions were NOT part of that fateful episode - so, they were put away in a storage room and eventually lost.

The "Missing Archives" turned up unexpectedly a few years ago on two QIC-24 tapes! They were examined and found to contain a virtual Gold Mine of goodies from that bygone era when hobbyists (not Billionaires) ruled the micro-computer world !!

It is recommended that you first download the "[Archive Name.index](#)" in order to better determine what you really need. (This saves time and bandwidth.)

Each product file is **actually** a Compressed - '**tar**' archive with a **".Z"** extension. The format is fully understood by WinZIP 6.0a or higher. **You should be using WinZIP 6.0a (or better) in order to properly de-compress & de-tar these files.**

This Archive will NOT be available indefinitely.

The contents of these files "were, at one time" Copyrighted by Technical Systems Consultants, Inc. They have long ago gone out of business. Reasonable attempts have been made to contact the authors, but with no success.

UniFLEX Text Editors			
LineEditor files	LineEditor.tar.Z	USEditor files	USEditor.tar.Z
